## (54) FLUORINE-CONTAINING COMPOUND, OPTICAL THIN FILM AND ANTIREFLECTIVE ARTICLE

## (57)Abstract:

PROBLEM TO BE SOLVED: To obtain the subject new compound useful as a raw material for optical thin films having low reflectivity and excellent abrasion resistance and for antireflective articles using the optical thin films.

SOLUTION: A compound of the formula:  $\text{CH}_2=\text{CH}-\text{O}-(\text{CH}_2)_a-\text{O}-(\text{CH}_2)_b-\text{Rf}-(\text{CH}_2)_b-\text{O}-(\text{CH}_2)_a-\text{O}-\text{CH}=\text{CH}_2$  [Rf is a fluorine-containing alkyl; (a) is 1-2; (b) is 0-3], e.g.  $\text{CH}_2=\text{CH}-\text{O}-(\text{CH}_2)_2-\text{O}-\text{CH}_2-(\text{CF}_2)_8-\text{CH}_2-\text{O}-(\text{CH}_2)_2-\text{O}-\text{CH}=\text{CH}_2$ . The compound of the formula:  $\text{CH}_2=\text{CH}-\text{O}-(\text{CH}_2)_a-\text{O}-(\text{CH}_2)_b-\text{Rf}-(\text{CH}_2)_b-\text{O}-(\text{CH}_2)_a-\text{O}-\text{CH}=\text{CH}_2$  is obtained by allowing a fluorine-containing dialcohol compound to react with a vinyl ether having a halogen in the presence of an alkali catalyst.

## LEGAL STATUS

[Date of request for examination]

24.08.2004

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
